

Monitor your construction projects online from anywhere in the world.

- Completely turn-key systems. All you need is power and a mounting site.
- Professionally installed with no hardware to buy.
- Convenient monthly billing with no contracts - when your project is done, so are we.
- Durable, weather-resistant cameras and enclosures to ensure maximum reliability.
- Long-range wireless connections and solar power systems available.
- All systems include our expert customer and technical support to keep your site accessible 24/7/365.

Explore multiple viewing options with our exclusive EOP Viewer

- Email, print or save images to your PC with a single click.
- Zoom to see project details with our high-resolution cameras.
- Browse through snapshots by specific day, month or year.
- View four snapshots at once to see progress at a glance.
- Choose Fullscreen, Split Screen or Overlay modes to compare past and present snapshots.
- Password-protected access helps keep proprietary information safe.

For documenting or monitoring your construction project, look no further than EyeOnProgress. We offer reliable and affordable progress monitoring solutions for all types of construction projects, including buildings, infrastructure, vessels and disaster recovery. Images of your construction project are stored on our in-house servers and can be viewed through a secure website, which you can access 24/7 from any computer with an Internet connection. Our online viewer allows you to save, print and e-mail images, view split screens and overlays and see up-to-the-minute images of your construction site, so you can easily monitor the progress of your project. Let EyeOnProgress be your eyes for the duration of your project, day and night.
